University of Science  
and Technology, Kumasi

## **MODULE 4**

# **FUNDAMENTALS OF PROMPT ENGINEERING**

**GUIDELINES FOR SUBMISSION TO DISCUSSION FORUM**

## ARTIFICIAL INTELLIGENCE

### ***Peer Response (Required)***

Reply to at least one classmate's post in 3–5 sentences.

Your response should:

- acknowledge their improved prompt
- suggest one further refinement
- explain how the refinement could improve relevance or reduce bias
- remain respectful and constructive

### **Example of a strong reply:**

"Your revised prompt adds useful context about the target audience. You might also specify the length or format of the response to make it even clearer. This could help the AI generate a more focused answer."

### **Weak reply example:**

"Good work."

(This will not count.)

### **How to Submit**

To submit your initial post:

1. Click "Add a new discussion topic"

2. Type your response in the text box
3. Click "Post to forum"

**To reply to a classmate:**

1. Open their post
2. Click "Reply"
3. Type your response
4. Click "Submit"

**Completion Requirement**

To receive a green completion tick for this activity, you must:

Submit one original discussion post

Reply to at least one classmate

**Both steps are required.**

- Discussion Guidelines (Netiquette)
- Use respectful and professional language
- Focus on prompts and AI communication
- Do not submit AI-generated responses
- Avoid offensive or misleading examples
- Do not share personal or confidential information
- Proofread before submitting

## **What We Are Looking For**

A strong contribution will demonstrate:

- understanding of prompt engineering principles
- ability to identify weaknesses in prompts
- improvement through clarity and structure
- reflective thinking about AI outputs

## **Begin Now**

Click “Add a new discussion topic” to start your contribution.
